

The most advanced and accurate outdoor monitoring system

Control > Identification > Alert > Regulation > Remediation

WT1 PRO

Tailored for emissions monitoring at the source and along fencelines

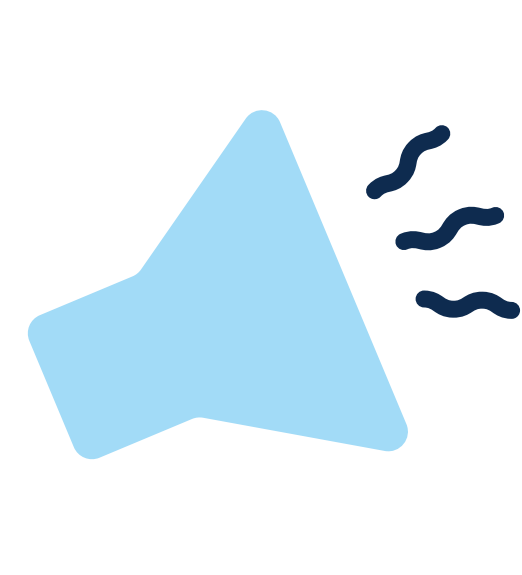

Gases

Particles

Odors

Noises

KEY FEATURES

- Odor identification and quantification in correlation with reference standards (EN 13725, ASTM 679)
- Triggering of remediation actions (via the 4-20mA input, the ON/OFF relay, or the API)
- Device suited for surface-based and channeled sources
- Gases, particles and noises analysis and identification
- Event signatures and fingerprints
- Real-time data (every 10 seconds)
